DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 20-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Guthry (5,509,657). Guthry discloses a level attached to the shaft of a putter. The level includes a level chamber with air enclosed inside a chamber (fig 1). Claim 4, the chamber includes a top and bottom housing. The level includes liquid and indicia/image on the face. Guthry discloses a level attached to the shaft of a putter by a hinge (56, fig 1). Guthry discloses an adjustment means between the level and the shaft attachment (56, fig 1) but does not disclose a drive means. The tongue and drive means is considered an obvious variation of the Guthry device since the remainder of the premise of both inventions are the same. One of ordinary skill in the art would modify or update the adjustment means for a more modern device.
